

APISTAN

ANTI-VARROA MITE STRIPS

- **KILLS VARROA, NOT THE HONEY BEES**
- **NO-MESS APPLICATION**

SPECIMEN LABEL

ACTIVE INGREDIENT:

Tau-fluvalinate (CAS #102851-06-9) . . . 10.25%

OTHER INGREDIENTS: 89.75%

Total 100.00%

EPA Reg No. 2724-406

KEEP OUT OF REACH OF CHILDREN

CAUTION

See additional precautions/directions

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label.

Wear gloves (e.g., latex) when handling the strips. Just before application, remove the required number of APISTAN® Strips from the pouch. To separate strips, hold firmly at corner, near tab, and pull along scored line, from top to bottom. Unused strips should remain in original package.

Do not place strips in direct contact with combs containing honey intended for human consumption. After treatment, do not use beeswax for human consumption (including honeycomb, chunk honey, and wax for confectionary purposes).

Use 1 strip for each 5 combs of bees or less in each brood chamber (Langstroth deep frames or equivalent in other sizes). Hang the strips within 2 combs of the edge of the bee cluster. **APISTAN Strips must be in contact with brood nest bees at all times.** If 2 deep supers are used for the brood nest, hang APISTAN Strips in alternate corners of the cluster, in the top and bottom super. For best chemical distribution, use APISTAN Strips when daytime high temperatures are at least 50° F.

FOR CONTROL

Remove honey supers before application of APISTAN Strips and do not replace until the end of the control period. For adequate control within a bee yard, treat all infested colonies within that yard.

Effective control may be achieved by treating hives in the spring before the first honey flow and in the fall after the last honey flow. Do not remove strips from hive for at least 42 days (6 weeks). Do not leave strips in hive for more than 56 days (8 weeks). Honey supers may be replaced after strips are removed.

FOR DETECTION

Place white, sticky paper below the frames (sticky side up). Place APISTAN Strips as per above instructions. At various intervals (up to 7 days), check for Varroa on withdrawn white, sticky paper from below the frames.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE

Keep strips in original unopened package until ready to use. Do not store in direct sunlight. Do not store unused strips in anything but original package. Do not store unused strips near pesticides or other chemical substances that could contaminate the strips and result in bee toxicity.

DISPOSAL

Do not reuse strips. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

CAUTION

Harmful if swallowed. Wash hands thoroughly with soap and water after handling strip.

FIRST AID	
IF SWALLOWED	<ul style="list-style-type: none">• Call a poison control center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by the poison control center or doctor.• Do not give anything by mouth to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-248-7763 for emergency treatment information.	

ENVIRONMENTAL HAZARDS

This product is toxic to honey bees if bees are exposed to direct application. **However, dried residues of this product are non-toxic to honey bees.** Treat during non-foraging periods to minimize adverse effects.

Seller makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer shall assume risks of use and handling of this material when such use and handling are contrary to label instructions.

Always read the label before using the product.
